logo

Learning mode

Full intervention with online meetings and classroom setting, on site

Target audience

Organisations in their entirety or departments (especially in the event of changes)

Duration

Total intervention of ~56h

Language(s) available

Italian, English, French

ERA review

Date 07/02/2024

Review The training supports the application of European Union legislation in the railway sector, covering risk management, Safety Management Systems, and reliability standards. Content is comprehensive, considering quantitative, statistical, and qualitative approaches to safety and the links between operational and occupational safety. The training is adapted to the organisation's needs and aim at achieving significant practical improvements, particularly in case of changes.
